Our **#SafeForest** early wildfire detection and security system rocked at the Natural Disasters Expo, held this week at the Miami Beach Conference Center, Florida, USA. It was its first public appearance.

With a edge computing architecture this web browser based system was developed at **LEITEK Innovative Solutions** demonstrates a superior performance in detecting smoke, flames and other classes of objects through advanced deep learning AI algorithms and a powerful data set captured along the years by its deployed systems and AI mining tools.
